

**Bozeman  
USS Montana**

**T**he USS Montana watch, crafted by the Bozeman watch company, was designed to honor the brave veterans who have fought to protect the freedom and democracy in our country. Though three attempts have been made, Montana is the only state in the nation without a battleship (that has seen active service) named after it. The Bozeman Watch Company's tribute is a beautiful way to commemorate the state and pay tribute to the men and women of the military.

With its raised blue Roman numerals and 25 jewels with 28,800 vibrations per hour, this timepiece is sure to attract attention for all the right reasons. It showcases a sweep second hand, a modified Val Granges automatic caliber, and convex domed sapphire crystal, giving it a sleekness that is always in good taste. Available in chic stainless steel, or with a sophisticated black or brown Caiman Crocodile strap with a deployment buckle, the USS Montana is COSC certified to assure accuracy.

Only 50 individually numbered pieces of this elegant watch are available. The limited edition USS Montana retails for around \$7,100. Visit [bozemanwatchcompany.com](http://bozemanwatchcompany.com) to check out the timepiece with their 360-viewing tool or to order. •
